

## Course Title: Tier III Resi Liquid Cooled Generator Installers & Service Providers Certification EDUARPDGEN301LC

**Course Description:** This 4-day course is designed to certify local contractors for installation, startup and servicing of Eaton’s Cutler Hammer brand of liquid cooled standby generators. The contractor will receive in-depth training and hands-on work with our generators, which will be installed at the training facility. After attending this class the contractor will become part of the Eaton Certified Contractor Network (ECCN) and be listed as a service provider for all of our generator products on our generator website developed for homeowners <http://www.residentialgenerators.eaton.com/>

**Objectives:**

- Certify contractors to provide installation, start-up, and service on liquid cooled generators through 75kw.
- Provide hands-on training, troubleshooting and servicing of working liquid cooled generators
- Provide opportunity for tear-down and a deep dive of the generators and associated transfer switches.

**Pre-requisites:** Tier II Generator Installer Certification Course or 5 years of standby power experience.

**Fee:** \$999 Charged upon enrollment includes continental breakfast and lunch as well as the certification. Contractors can sign up through Eaton University.com and pay by credit card.

**Registration:** Course enrollment forms can be found at the following website.
